

SmartDrawer™

A Low-Cost, Automated Solution to Control, Track and Manage Inventories and Critical Assets at the Point-of-Use

SmartDrawer is a breakthrough technology providing Point-of-Use control solutions to:

- **Track Assets**
- **Control Inventory**
- **Manage Supply Chain Information**

SmartDrawer technology is extremely versatile and configurable, allowing users to choose the best level of access control and accountability for each application. Drawers can be set to provide part number control for single-item dispensing and returns or it can provide high-density storage. The choice is yours.

Additionally, for Absolute Control® of costly tools and inserts at the item level, SupplyPro has developed the SmartDrawer Box Dispenser (SBD). The SBD allows the client to define the quantity of inserts or small tooling per box in each secure, individual casing, eliminating the opportunity for abuse and waste.

Controlled 24x7 Point-of-Use Availability

SmartDrawer is ideal for managing consumable materials like:

- Production components
- Critical parts
- Cutting tools
- MRO and safety supplies
- Welding supplies
- Electrical parts

Returnable assets can also be managed:

- Calibrated tools and instruments
- Hand and power tools
- Maintenance spares and parts
- Radios
- Portable computers
- Vehicle keys
- Fixtures and tool holders

SmartDrawer can be adopted in many different environments such as:

- Remote areas
- Line side
- Maintenance areas
- Unattended storerooms
- Parts stores
- Work cells

A Key Component in Overall Supply Chain Initiatives

SupplyPro gives you automated tools to manage and control inventories and assets at the Point-of-Use to support key supply chain initiatives like:

- Lean manufacturing
- Cell-based manufacturing
- Line-side replenishment
- Integrated supply
- Vendor-Managed Inventory (VMI)
- Keep-full programs

Six Different Lid Configurations for Optimal Asset Management

*Opening sizes are for exterior dimensions

2 Lid Configuration
Standard Density
Opening: 275mm x 509mm

4 Lid Configuration
Standard Density
Opening: 275mm x 241mm

8 Lid Configuration
Standard Density
Opening: 125mm x 241mm

12 Lid Configuration
Standard Density
Opening: 275mm x 56mm

16 Lid Configuration
High Density
Opening: 125mm x 102mm

24 Lid Configuration
High Density
Opening: 125mm x 56mm

NOTE: Compartment depth will vary and is dependent on drawer depth.

SupplyLink™ - Universal Touch Screen Control Module

SupplyLink is a universal control module that drives SupplyPro Point-of-Use devices. SupplyLink's easy-to-use touch screen interface is a visual gateway to the SupplyPort and a world of productivity-enhancing information. Each SupplyLink can drive one or many SupplyPro products, including SupplyBay, SupplyLocker, SupplyScanner and SmartDrawer.

About Sierra Group

Sierra Group is a specialised systems integrator working with its customers to deliver **sustainable** process changes and real bottom line improvement to their business. As the exclusive Australian and Asia Pacific distributor for SupplyPro systems, Sierra is uniquely placed to **drive costs out of your business – for good**. Visit us at www.sierra-group.com or call **1300 850 563 (Aust Local call)** to see how we can help your business today.
